Modular solutions for architecture and design projects

Constantly developing information and communications technology has brought new ways of using spaces.

The modern multi-space office allows suitable working spaces for specific tasks: quiet spaces for demanding work requiring concentration; spaces for groups; as well as meeting points for various types of conference and coworking. Multi-space offices can accommodate various user groups depending on how mobile they are in relation to their workstations.

STIMEX

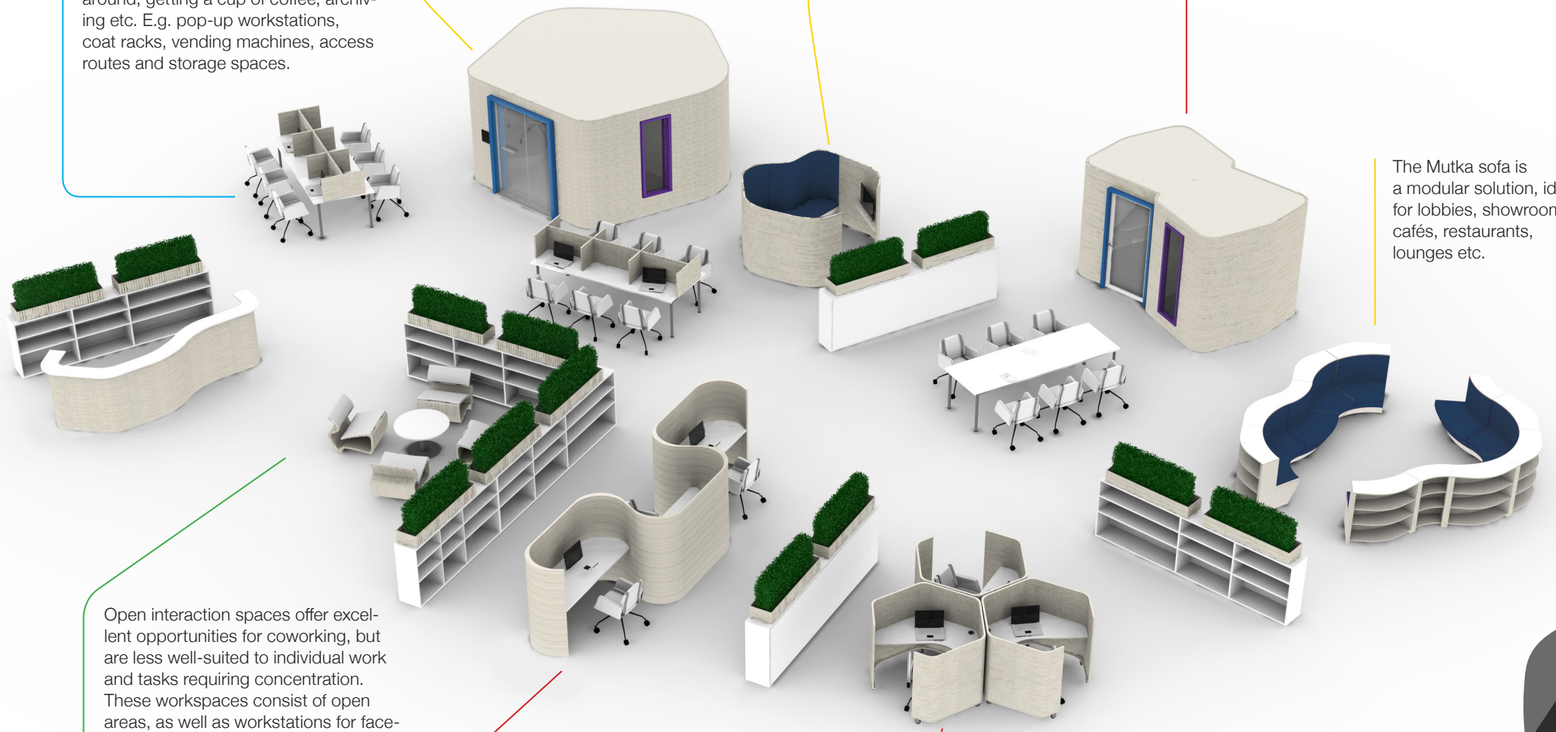
Short-term pop-up spaces provide facilities and rooms where staff, and visitors, can spend brief, but often significant moments while moving around, getting a cup of coffee, archiving etc. E.g. pop-up workstations, coat racks, vending machines, access routes and storage spaces.

structural and acoustic rooms for public and office environments are designed for activities requiring intensity and silence.

Kalla is a semi-public conference room. Unprecedented free-form design gives the elements structural rigidity and aesthetic appeal.

Uppo is a structural and acoustic room, which can be used e.g. as a video conference room.

The Mutka sofa is a modular solution, ideal for lobbies, showrooms, cafés, restaurants, lounges etc.



Open interaction spaces offer excellent opportunities for coworking, but are less well-suited to individual work and tasks requiring concentration. These workspaces consist of open areas, as well as workstations for face-to-face customer service.

Intensive individual workspaces allow for mental focus and solo work. These ‘private space’, e.g. an open workstation in a quiet working area, create ‘traditional’ open-office zones.

Mutteri is a semi-public workstation for one person.

TOU CH DO WN

We Meet è un progetto dedicato alle nuove esigenze e tipologie di spazi del mondo contemporaneo, offrendo inedite possibilità di lavorare e concentrarsi, in piccoli gusci accoglienti.

EN We Meet is a project dedicated to the new demands and typologies of spaces of the contemporary world, offering unprecedented possibilities to work and focus in small hospitable shells.

FR We Meet est un projet dédié aux nouvelles exigences et typologies des espaces du monde contemporain, en offrant des possibilités inédites de travailler et se concentrer, dans petites coquilles confortables.

DE We Meet ist ein Projekt, das an die neuen Anforderungen und Raumtypologien der heutigen Welt gewidmet ist und bietet neue Möglichkeiten in kleinen gemütlichen Schalen zu arbeiten und sich konzentrieren.

ES We Meet es un proyecto dedicado a las nuevas exigencias y tipologías de los espacios del mundo contemporáneo, que ofrece posibilidades inéditas de trabajar y agruparse en pequeñas cáscaras acogedoras

COL LAB ORA TIVE

La possibilità di affiancare più moduli, permette di creare delle composizioni aperte e sinuose, nelle quali la privacy, la convivialità e l'operatività convivono piacevolmente.

EN TThe possibility of placing more forms side-by-side, allows creating open and sinuous compositions, in which privacy, conviviality and work can pleasantly stay together.

FR La capacité d'assembler de multiples modules permet de créer des compositions sinueuses ouvertes ou cohabitent agréablement l'intimité, la convivialité et la capacité opérationnelle.

DE Die Möglichkeit, mehrere Module neben zu stellen, ermöglicht eine offene und geschmeidige Komposition zu schaffen, wo die Privatsphäre, die Geselligkeit und die operative Tätigkeit angenehm zusammenleben.

ES La posibilidad de flanquear más módulos, permite de crear composiciones abiertas y sinuosas, donde la vida privada, la convivialidad y la operatividad conviven agradablemente.

MEDIA SPACE INTER ACTIVE

La multimedialità può diventare parte integrante di qualsiasi ambiente, dalle sale meeting agli ambienti didattici, ricreativi e lounge, sempre all'insegna della leggerezza formale e del dinamismo.

EN The multimedia can become an integral part of every space, from meeting rooms to didactic, recreational and lounge places, always in a spirit of formal lightness and dynamism.

FR Le multimedia peut devenir une partie intégrante de tout environement, des salles de réunion aux milieux didactiques, de loisir et lounge, toujours avec légèreté et au dynamisme.

DE Multimediale Geräte können einen integrierenden Bestandteil jeder Umgebung werden, wie Konferenz- und Bildungsräume, bei Freizeit und Lounge, immer mit Leichtigkeit und Dynamik.

ES La multimedialidad puede convertirse en una parte integrante de cualquier espacio, desde las salas reuniones hasta los entornos didácticos, recreativos y lounge, siempre caracterizada por la ligereza formal y el dinamismo.

CON FOR TA BLE

La modularità e la struttura free standing dei vari elementi, consentono di dare vita facilmente ad un'infinità di soluzioni, caratterizzate dal calore del legno, dal fascino del tessuto e da una gradevole sensazione di comfort acustico.

EN The modularity and the freestanding structure of the various elements, allows to easily giving life to an infinity of solutions, characterized by the warmth of wood, the charm of fabric and the pleasant feeling of acoustic comfort.

FR La modularité et la structure autonome des différents éléments permettent de donner vie à une infinité de solutions, caractérisés par la chaleur du bois, le charme du tissu et une sensation agréable de confort acoustique.

DE Die Modularität und die free standing Struktur der verschiedenen Elemente erlauben eine unendliche Anzahl von Lösungen einfach zu erschaffen, die durch die Wärme des Holzes, den Reiz der Stoffe und ein angenehmes Gefühl von akustischem Komfort gekennzeichnet sind.

ES La modularidad y la estructura free standing de los varias elementos, permiten crear fácilmente un número infinito de soluciones, caracterizadas por el calor de la madera, el atractivo del tejido y una agradable sensación de comfort acústico.
